# SUMMARY DATA FACE-ASP

**FondaMental Advanced Centre of Expertise – High-Functioning Autism**

**FACE-ASP** (*FondaMental Advanced Center of Expertise – Asperger Syndrome*) is a clinical database built from the computerized medical records of the FondaMental Expert Centers for Autism Spectrum Disorders without intellectual disability.

This summary is intended for all teams wishing to access the **FACE-ASP** database data to implement, develop, or promote a research project. It summarizes, in a non-exhaustive manner, all the data available in the FACE-ASP database, classified by major themes.

The Charter for Access to FACE/BioFACE/PSY-COH Data and Samples and Publication Rules, available on the FondaMental Foundation website, describes the data access process.

## SOMATIC ASSESSMENT
